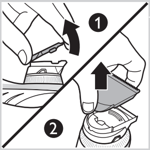
- This appliance is only intended for clipping human scalp hair. Do not use it for any other purpose.
- If the appliance is subjected to a major change in temperature, pressure or humidity, let the appliance acclimatise for 30 minutes before you use it.

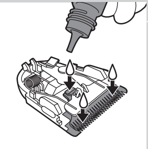
Compliance with standards

- The appliance complies with the internationally approved IEC safety regulations and can be safely cleaned under the tap.
- This Philips appliance complies with all standards regarding electromagnetic fields (EMF). If handled properly and according to the instructions in this user manual, the appliance is safe to use based on scientific evidence available today.

Before first use



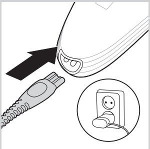
1 **Pull the front of the cutting element upwards (1) and remove the cutting element from the appliance(2).**



2 **Turn the cutting element and lubricate the three points indicated with oil from the oil bottle supplied.**

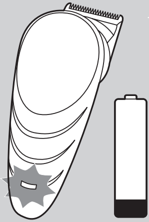
Charging

Charge the appliance for at least 1 hour before you use it for the first time or after a long period of non-use.
When the appliance is fully charged, it has a cordless clipping time of up to 1 hour.
When the charging light flashes orange, the battery is running low (approx. 10 minutes of operating time left) and you need to charge the appliance.



1 Make sure the appliance is switched off.

2 Insert the appliance plug into the appliance and insert the adapter into the wall socket.



- The charging light starts to flash white to indicate that the appliance is charging.
- When the battery is fully charged, the charging light lights up white continuously.
- After approx. 30 minutes the charging light goes out to save energy.

Optimising the lifetime of the rechargeable battery

Discharge the rechargeable battery completely twice a year by letting the motor run until it stops. Then fully recharge the battery.

Corded clipping

1 Switch off the appliance.

2 Connect the appliance to the mains and wait a few seconds before you switch it on.

Note: If the battery is completely empty, wait a few minutes before you switch on the appliance.

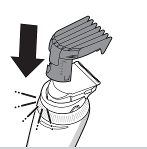
Using the appliance

Make sure your hair is clean and dry. Do not use the appliance on freshly washed hair.

Preparing for hair clipping

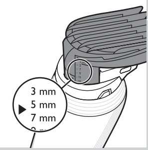
1 Comb your hair with a styling comb in the direction of hair growth.

Clipping with comb attachment

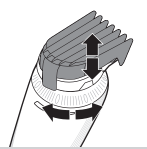


1 Insert the edge of the comb attachment into the swivel head.

Make sure the comb attachment locks into position properly



Note:The length settings are indicated on the comb attachment.



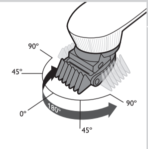
2 Turn the length setting adjustment ring to set the comb attachment to the desired setting.

◗ The arrowhead on the appliance indicates which setting you have selected.

Tip: Use different settings to create a natural and smooth transition between the various hair lengths from your neckline to the top of your head.

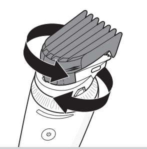
Do not turn the length setting adjustment ring beyond the highest setting.

3 **Turn the swivel head to the position that is most comfortable for your arm when you clip the different parts of your head.**



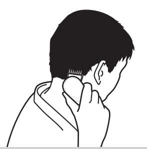
Using the swivel head

- From its starting position of 0° (pointing forwards), you can turn the swivel head 45° or 90° to the left or right. This enables you to adjust the position of the cutting element to the part of your head that you are clipping. This makes it much easier to clip your own hair.
- To set the cutting element to the desired position, turn the swivel head ('click').



Note: Always adjust the position of the cutting element by turning the swivel head. Do not turn the cutting element or the comb attachment.

Note: Do not turn the swivel head more than 90° to the left or right.



- The swivel head allows you to hold and use the appliance like a styling comb.

4 **Press the on/off button to switch on the appliance.**

QC5570: Press the button briefly.
QC5580: Press the button for 2 seconds.

5 **Move the clipper through the hair slowly.**

6 **Regularly remove cut hair from the comb attachment.**

If a lot of hair has accumulated in the comb attachment, remove the comb attachment from the appliance and blow and/or shake the hair out of it. When you remove the comb attachment, the selected setting does not change.

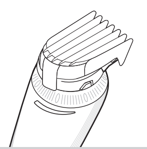
Tips

- We advise you to start clipping at the highest setting of the regular comb attachment and to reduce the setting gradually.
- To clip most effectively, move the appliance against the hair growth direction.
- Since all hair does not grow in the same direction, you need to move the appliance in different directions (upwards, downwards and across).
- Make sure that the flat part of the comb attachment is always fully in contact with the scalp to obtain an even result
- Write down the settings you use to create a certain hairstyle as a reminder for future clipping sessions.

Contouring without comb attachment

You can use the appliance without comb attachment to clip your hair very close to the skin (0,5mm) or to contour the neckline and the area around the ears.

Be careful when you clip without comb attachment because the cutting element removes every hair it touches.

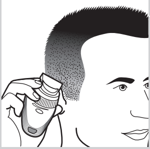


1 Pull the comb attachment off the swivel head.

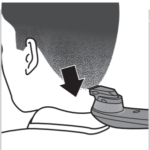
Never pull at the flexible top of the comb attachment. Always pull at the bottom part.

2 Comb the hair ends over the ears before you start to contour the hairline.

3 Press the on/off button to switch on the appliance.



4 When you shape the contours around the ears, tilt the appliance in such a way that only one edge of the cutting element touches the hair ends.



5 To contour the neckline and the sideburns, turn the appliance and make downward strokes.

Note: Move the appliance slowly and smoothly. Just follow the natural hairline.

6 Adjust the position of the swivel head to make contouring easier.

Cleaning and maintenance

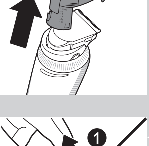
Clean the appliance every time you have used it by rinsing it under the tap or with the cleaning brush supplied.

Never use compressed air, scouring pads, abrasive cleaning agents or aggressive liquids such as petrol, acetone or ethereal oils to clean the appliance.

Be careful that the cutting element does not fall on the floor.

Cleaning the cutting element and comb attachments

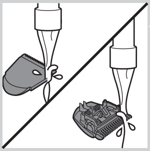
1 Switch off the appliance and disconnect it from the mains.



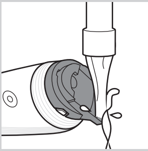
2 Remove the comb attachment.

3 Rinse the comb attachment under the tap or clean it with the cleaning brush supplied.

4 Place your thumb in the center of the round side of the cutting element and your index finger on the teeth of the cutting element (1). Use your index finger to lift the cutting element from the swivel head (2).



5 Rinse the cutting element under the tap or clean it with the cleaning brush supplied.



6 Rinse the inside of the appliance under the tap or clean it with the cleaning brush supplied.

7 Insert the lug of the cutting element into the slot (1) and push the cutting element back onto the swivel head (2).

Lubrication

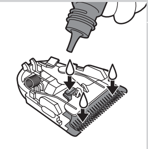
1 Pull the front of the cutting element upwards (1) and remove the cutting element from the appliance (2).



2 Turn the cutting element and lubricate the three points indicated.

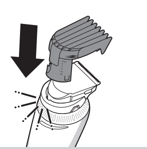
使用本产品

确保您的头发清洁且干燥。请勿在刚洗过的湿发上使用本产品。

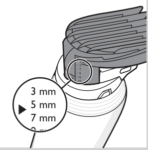
准备头发修剪

1 使用定型梳沿头发生长的方向梳理头发。

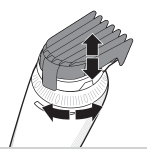
使用发梳理发



1 将梳齿附件的边缘插入旋转头。
确保梳齿附件正确锁定到位



注意： 梳齿附件上指示长度设置。



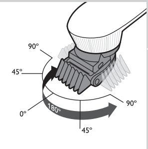
2 旋转长度设置调整环，将梳齿附件设为所需设置。

- 产品上的箭头表示您选择的设置。

提示： 使用不同设置在从颈部到头顶的各种头发长度之间实现自然顺利的过渡。

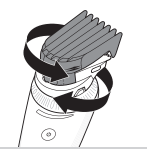
切勿将长度设置调整环转到最高设置之外。

3 在修剪不同位置的头发时，可以将旋转头转动到您的手臂感觉最舒服的位置。



使用旋转头

- 您可以将旋转头从开始位置 0°（指向前方）向左或向右旋转 45° 或 90°。用这种方法，可以将修剪部件的位置调整到要修剪的那部分头发。这使您为自己理发更容易。



- 要将修剪部件设置到所需位置，请转动旋转头（可听到“咔哒”一声）。

注意： 始终转动旋转头调整修剪部件的位置。请勿直接转动修剪部件或梳齿附件。

不用梳齿附件的情况下修整轮廓

即使没有梳齿附件，您也可以使用理发器以非常贴近头皮的距离（0.5 毫米）或紧密贴合颈部周围和双耳附近的皮肤修剪头发。

由于修剪部件会去除接触到的每一根头发，因此在没有梳齿附件修剪头发时要小心。

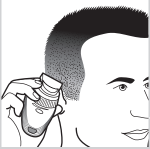
切勿拉梳齿附件容易变形的顶部。必须拉底部。



2 沿着耳朵梳理发梢，然后开始修整发际线。
